

Valley View Educational Enrichment Foundation

Computers for Students Grant Program

Program Objective:

To distribute computers, fairly and equitably, to at-risk and economically disadvantaged students within the district. To provide an educational supplement made available to qualified students that are unable to access a computer.

Computer Grant Criteria

1. Each student must be in good standing with the school district.
2. Each student must NOT have disciplinary concerns during the grant period.
3. NO student may accept on behalf of any other student or family member.
4. Each student MUST provide evidence of the use of the equipment to the Foundation on a regular basis. This method will be identified upon awarding of the equipment.
5. Each student agrees to maintain the equipment in working condition or notify the Foundation that it has become disabled and request repairs.
6. Each student agrees to acquire the necessary software, other than that provided with the computer, to continue use of the equipment. This MUST be done with proper license agreements on all software.
7. The equipment is to be used by the student primarily for educational purposes related to enhancing their academic capabilities.

The Foundation reserves the right to revoke the privileges of the student receiving the equipment if the student fails to comply with any of the above for a period of one full year after the student receives the equipment.

It is the intention of this program to make a computer available to disadvantaged students for use at home. This program is a one-year temporary grant until the recipient provides such evidence of the intended use of the equipment. The Foundation will then make the gift permanent.

Application and Award Process:

1. Applicants will submit applications, available at any school or the district Administration Center, to the address listed below.
2. The Foundation will review the application and confirm compliance with the grant criteria.
3. The Foundation will notify the applicant of the status of their application and arrange for delivery of the equipment if the applicant meets the criteria and if equipment is available.
4. The student will comply with the Acceptance criteria and receive the computer for permanent ownership or be required to return the equipment to the Foundation.
